

**CLAIMS**

What is claimed is:

1. – 52. (canceled)
53. (new) A system for a parking facility comprising:
  - a card;
  - a base coupled to a vehicle, wherein the base is associated with the card;
  - a motion sensor located in the base to notify a security patrol of a disturbance of the vehicle, wherein the card is used to activate the motion sensor; and
  - a locator panel in communication with a plurality of locators to triangulate the position of the base, wherein the locator panel displays the triangulated position to the card user.
